SUMMARY

Android Engineer with 4 years of experience building and maintaining mobile applications using Kotlin, Java, and Android SDK. Skilled in full SDLC, UI/UX implementation, and Continuous Integration, with a track record of delivering high-quality, user-focused solutions for both startups and established companies.

EXPERIENCE

PT. MIMOTEK INDONESIA – Jakarta, Indonesia

Mobile Application Developer (April 2023 – Now)

- Developed, enhanced, and maintained Android applications for multiple enterprise clients such as PT Indoguna Utama, PT Nissin Foods Indonesia, PT Indopangan Sentosa, PT Bimaruna Jaya, PT Agronesia Raya, and PT Nissan Motor Indonesia, supporting digital transformation and operational efficiency across various industries.
- Led end-to-end development cycles—from requirement analysis, technical planning, and UI/UX collaboration to implementation and delivery—ensuring each application aligned with business goals and user needs.
- Migrated legacy Android codebases from Java to Kotlin, improving code readability, maintainability, and development speed while reducing technical debt.
- Built and maintained robust Android features such as data input modules, operational tools, reporting dashboards, and workflow automation to streamline daily processes for client teams.
- Coordinated closely with product owners, QA engineers, and designers to ensure feature clarity, smooth user experience, and adherence to project milestones.
- Supervised outsourced developers by conducting code reviews, validating feature completeness, and enforcing clean architecture and coding standards to maintain product quality.
- Improved development workflow by optimizing Git branching strategies, increasing code maintainability, and enhancing documentation for better team collaboration.

Android Engineer Freelancer (January 2023 – March 2023)

- Built Largo Stock Check app to streamline inventory inspection processes.
- Implemented import/export functionality for stock data, improving operational efficiency.
- Delivered a smooth, bug-free application aligned with user needs.

PT. TRITUNGGA MULTI KREASI – Jakarta, Indonesia

IT Support Freelancer(January 2021 – Present)

- Provide technical support and troubleshooting for various hardware and software issues.
- Diagnose and resolve system malfunctions to ensure optimal performance and operational efficiency.
- Maintain and optimize IT systems to prevent recurring technical problems for clients.

PT. VIDIO DOT COM – Jakarta, Indonesia

Android Engineer Intern (August 2022 – December 2022)

- Participated in the full SDLC for the team, contributing to feature development, bug fixing, and UI improvements for the Vidio mobile app.
- Created reusable Android UI components for Vidio's internal design system/library, improving development consistency and reducing duplication across teams.
- Adjusted and optimized the app's UI/UX for the 2022 FIFA World Cup, ensuring layouts, navigation, and live-match elements were responsive, visually aligned, and ready for high-traffic events.
- Assisted in implementing Continuous Integration (CI) to enhance code quality, streamline build workflows, and support faster iteration during development.
- Collaborated with senior Android engineers, designers, and Test Engineer (TE) teams to ensure features met performance, visual, and usability standards.

EDUCATION

ESA UNGGUL UNIVERSITY (September 2019 – February 2023)

Bachelor of Computer Science – GPA 3.83

SKILLS

- Android
 - AI/ML
- Git
 - Java
- Kotlin
 - Python
 - UI/UX Design

CERTIFICATION

- **Mastering AI Bootcamp – Skill Academy By Ruang Guru**
Completed an intensive AI bootcamp covering foundational to intermediate machine learning concepts, data preprocessing, supervised/unsupervised algorithms, and practical model building. Gained hands-on experience implementing AI workflows and deploying models using Python-based ML libraries.
- **Belajar Analisis Data dengan Python – Dicoding**
Learned how to perform end-to-end data analysis using Python, including data cleaning, transformation, visualization, and exploratory data analysis. Developed the ability to extract insights from datasets using Pandas, NumPy, Matplotlib, and related tools.
- **Belajar Dasar Data Science - Dicoding**
Built strong fundamentals in data science, covering statistics, data preprocessing, model evaluation, and introductory machine learning techniques. Understood how to structure data projects and apply algorithms to solve real problems.
- **Belajar Dasar Structured Query Language (SQL) – Dicoding**
Acquired practical SQL skills including querying relational databases, joining tables, filtering datasets, and writing optimized queries. Strengthened ability to work with backend data structures essential for mobile and analytical applications.
- **Android Developer – Binar Academy**
Completed a structured Android development program focused on Kotlin, Android architecture, UI/UX implementation, API integration, and clean code best practices. Gained real-project experience building scalable and maintainable Android apps.
- **UI/UX Design - SanbarCode**
Learned essential UI/UX design principles including user flow development, wireframing, prototyping, typography, and usability testing. Practiced designing intuitive interfaces using industry-standard tools like Figma.
- **UI/UX Design - KMMI Bina Nusantara University**
Participated in an academic-level UI/UX program focusing on human-centered design, design thinking, user research, and interface prototyping. Strengthened understanding of how to translate user needs into functional digital experiences.

ORGANIZATION

GOOGLE DEVELOPER STUDENT CLUB ESA UNGGUL

Mobile Developer (September 2021 – August 2022)

- Prepare various materials needed for the workshop

DPM FASILKOM ESA UNGGUL

Faculty of Computer Science General Election Staff (November 2020 - January 2022)

- Assigned to prepare various needs to conduct the election of the faculty
